Race the Legends of Grand Prix

Grand Prix Legends™

Now there's a racing sim that puts you behind the wheel of an open-wheel racecar for some of the most intensely competitive racing in Grand Prix history. The 1967 season is the setting.

Eleven historic tracks, including Nurburgring,

Monaco and Spa, are narrow, lined with trees, houses and spectators.

You sit mere inches off the ground as you blast through every twist and turn of the track, struggling to achieve the fine balance between speed and danger. Stay focused and you'll race to the finish line in *Grand Prix Legends*, the simulation that combines the golden age of racing with cutting-edge 3D technology.

Installing a Ceiling Light

If you're lucky, this task will take only a few minutes, provided you have the right hardware.

First, shut off power to the light's circuit. Study the instructions to learn how to attach the fixture to the box. You'll need some kind of lighting adapter to mount your fixture to the box.

Gently lower the old fixture, if any. Disconnect its leads, but not any other wires you may find in the box. Install the adapting device recommended by the manufacturer. Splice the new fixture's leads to the house wires. Fold the wires up into the box and attach the fixture.

Tip From the Pros: Insert each stranded fixture wire into a wire connector before you push in a solid house wire. Then tighten the connector.

Electrical Wiring helps you complete wiring jobs on your own.

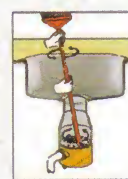

Use *Photo HomeDesigner™* to create a design around a photo of your own home.

Plumbing

Jammed Garbage Disposal

If your disposal hums but doesn't grind when you switch it on, something is probably stuck inside. Shut it off, then push the reset button on the reversing switch on the bottom of the unit. Newer disposals often have a hexagonal fitting for an Allen wrench on the bottom. Insert the wrench and turn it back and forth to free the mechanism.

With older models, a more brutish approach may be necessary. Lever a broom handle against the side of the drain opening and against your disposal's blades. Move the blades back and forth to release the clog.
